SUMMARY

Backend engineer with 6+ years of experience building scalable, high-availability services in Go on AWS.

EXPERIENCE

Senior Backend Engineer

2023 – Present

Acme Cloud Inc., Remote

- Designed and operated a Go microservice platform handling 10K requests per minute at peak
- Led a zero-downtime migration of 200M records from MySQL to DynamoDB
- Designed an event-driven audit pipeline with SQS and Lambda
- Reduced p99 API latency by 40% by profiling and parallelizing hot paths

Backend Engineer

2019 – 2023

Widget Works Ltd., Toronto

- Built REST and gRPC APIs in Go for a B2B analytics product
- Introduced CI/CD pipelines that cut release time from days to hours
- Maintained a legacy PHP monolith during the migration period

SKILLS

Go, Python, MySQL, AWS, Docker
